04 GAMEWEEK MANAGEMENT

Choose a player you want to transfer

General transfer rules

A manager selects a player to transfer out, then chooses an eligible player to transfer in.

The replacement should normally occupy the same position, for example **DEF → DEF**, unless your game specifically allows position changes.

Free Transfers

You receive 1 Free Transfer each Gameweek and can save up to 2.

Squad Rules

All transfers must keep your squad within its budget, position, and club limits.

No Transfer Hits

There are no paid transfers or points deductions. Transfers above your available allowance cannot be confirmed.

When replacing a player:

Available = Bank balance + sale value of outgoing player

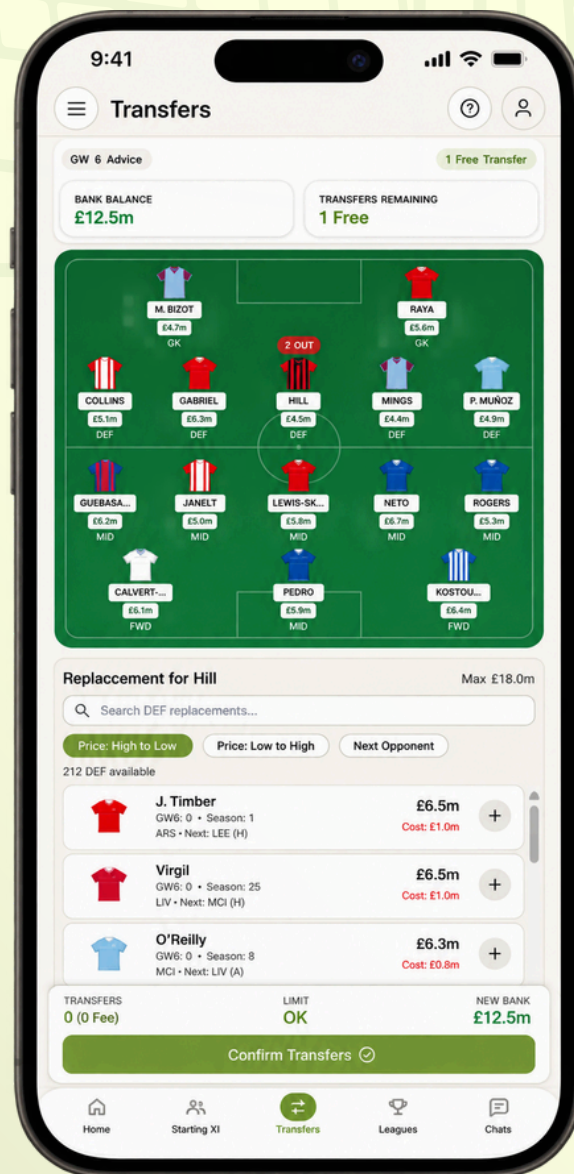

Deadline

Transfers should be confirmed before the Gameweek deadline to apply to that Gameweek.

Information

Get 1 Free Transfer per Gameweek and save up to 2. Stay within your budget, position and club limits. Extra transfers are not allowed and will be rejected.

Manage your team before each Gameweek deadline.

Review your squad, make any available transfers, choose your formation and tactic, select your Starting XI and Bonus Players, and configure your substitutes. All changes must be saved before the deadline. Once the Gameweek is locked, your selection cannot be changed.
